Dear Union Pacific Train Dispatchers,

As the General Chairperson on the Brotherhood of Railroad Signalmen's Union Pacific General Committee, I am honored to express our full endorsement of the American Train Dispatchers Association in its important effort to organize on the Union Pacific Railroad. The work of Train Dispatchers is crucial to the safety, efficiency, and dependability of our rail system, and your dedication deserves the full support of a union standing by your side.

Union representation for Dispatchers is not just significant for improving working conditions on Union Pacific—it is vital for strengthening the voice of all railroad workers across the nation. The inclusion of Dispatchers in the unionized workforce marks a critical step forward in our shared commitment to worker safety, dignity, and respect within the railroad industry. When the skilled men and women who coordinate the movement of our trains have the protections and support a union provides, it sets a powerful example for other sectors and reinforces the importance of unity in the labor movement.

Organizing Dispatchers on Union Pacific will send a clear message to the industry: that the hard work of rail workers cannot be overlooked and that every member of the railroad community is entitled to fair treatment, secure working conditions, and a voice in their workplace. The labor movement is strengthened with each step we take toward inclusivity and solidarity, and bringing Dispatchers under union representation bolsters this collective power.

Please know that the Brotherhood of Railroad Signalmen stands firmly beside you as you consider joining the American Train Dispatchers Association. We are committed to supporting your efforts and celebrating this crucial achievement for both unions and the labor movement as a whole. Together, we will continue to work toward a stronger, fairer future for all rail workers.

In solidarity,

Aaron Carter
